PROFESSIONAL SUMMARY

IT professional with a BSc (Hons) in Software Engineering from Birmingham City University, UK, and UK-accredited Level 4 & Level 5 Professional Diplomas in Software Engineering. Hands-on experience building 5+ end-to-end applications across Java, PHP, Android, React, MySQL and Firebase, combined with practical exposure to system operations, digital workflow management, data reconciliation, and staff training in a live business environment. Semi-finalist (Top 10%) at Rootcode's TECH-TRIATHLON 2025 among 100+ competing teams. Fluent in English and Sinhala, seeking to bring technical and analytical skills to an IT role.

TECHNICAL SKILLS

Programming Languages: Java, PHP, SQL

Mobile Development: Android (Java), Flutter

Frontend: HTML5, CSS3, JavaScript, React

Backend: Java (Swing), PHP

Cloud & BaaS: Firebase Firestore, Firebase Authentication, Firebase Realtime Database, Firebase Storage

Database: MySQL (schema design, query optimization, dynamic configuration)

DevOps & Build Tools: Git, GitHub, GitHub Actions, Apache Ant

Design & Prototyping: Figma, JFreeChart

Networking & IT Support: TCP/IP, DNS, DHCP, LAN/WAN, hardware & software troubleshooting, system monitoring, user account management

Operating Systems: Windows (proficient)

WORK EXPERIENCE

Training Person in Charge (Promoted Role) — 2025 – Present

Portcity Digital (Pvt) Ltd | Sri Lanka

- Promoted within two months following demonstrated leadership and strong operational performance
- Designed and delivered training programmes on internal systems, digital tools, and operational procedures for new and existing staff
- Assessed trainee performance and provided structured, data-driven feedback to accelerate onboarding
- Authored technical training materials, process guides, and SOPs to standardise system usage and service delivery
- Coordinated with management on systems and process improvements, aligning training with business and technology goals

Operations Officer — 2025

Portcity Digital (Pvt) Ltd | Sri Lanka

- Managed day-to-day digital operations, transaction handling, and administrative workflows across departments
- Performed Excel-based reconciliation and balancing, ensuring data accuracy across operational and financial records
- Monitored compliance and operational systems, identifying and resolving discrepancies promptly
- Maintained and updated digital records using operational management and reporting tools
- Identified process inefficiencies and implemented workflow improvements, streamlining administrative operations

KEY PROJECTS

Vehicle Management System (VMS) — 2024

Academic Project | Java, Java Swing, MySQL, JFreeChart, GitHub Actions, Apache Ant

- Built a Java Swing desktop application managing 4 core modules — vehicles, stock, employee records, and service workflows — reducing manual record-keeping by an estimated 60%
- Integrated MySQL with dynamic database configuration across 3+ deployment environments
- Developed 5+ interactive JFreeChart analytics dashboards for real-time inventory and service insights
- Configured a CI/CD pipeline with GitHub Actions and Apache Ant, cutting manual deployment time by ~80%

GovConnect – Government Services Web Platform 2025

Tech-Triathlon by Rootcode – Team CLUSTERCODE | PHP, MySQL, Figma, Python

- Architected a digital government services platform with 4 modules: appointment booking, employee management, authentication, and citizen feedback
- Advanced to the semi-finals across all 3 phases of Rootcode's TECH-TRIATHLON 2025, placing in the top 10% of 100+ teams
- Delivered 3 complete submissions in 48 hours: Figma UX prototypes, a PHP/MySQL web application, and a Python data analysis report

CCafe – Android Café E-Commerce & Management App 2025

Academic Project | Java, Android SDK, Firebase Firestore, Firebase Auth, Firebase Storage, Firebase Realtime Database

- Built an Android e-commerce app with 6 core features including menu browsing, cart, order tracking, and an admin dashboard
- Integrated Firebase Firestore for sub-second real-time sync of menu, order, and inventory data
- Implemented Firebase Authentication with role-based access control (RBAC) for customer and admin roles
- Independently designed, developed, and deployed the app within a 4-week academic sprint

EDUCATION

BSc (Hons) Software Engineering

Birmingham City University, UK

Key Modules: Software Development Life Cycle (SDLC) • Object-Oriented Programming (OOP) • Software Architecture & Design Patterns • Database Systems • Software Testing & Quality Assurance

Level 5 Professional Higher Diploma in Software Engineering

Skills and Education Group Awards & UK Awards, UK

Internationally accredited UK qualification covering advanced software engineering principles, design patterns, emerging technologies, and real-world application development.

Level 4 Professional Diploma in Software Engineering

Skills and Education Group Awards & UK Awards, UK

UK-accredited professional diploma aligned with global software engineering standards, integrating the latest software engineering advancements and practical skills.

ACHIEVEMENT

Tech-Triathlon by Rootcode — Semi-Finalist (GovConnect), 2025

Represented Team CLUSTERCODE in Rootcode's TECH-TRIATHLON 2025 — a multi-disciplinary competition with 100+ teams across 3 phases: Designathon, Hackathon, and Datathon. Advanced to the semi-finals (top 10%) delivering original solutions across UX design, full-stack development, and Python data analysis within 48-hour deadlines.

CORE COMPETENCIES

Technology Leadership • Team Training & Development • Problem Solving • Communication • Decision Making • Strategic Planning • Data Reconciliation • Mentorship • Presentation Skills

PERSONAL DETAILS

Date of Birth: 2004
Nationality: Sri Lankan
Marital Status: Single
Languages: English (Fluent) | Sinhala (Native)
Driving License: Valid Sri Lanka Driving License
